SUMMARY

Computer Engineering graduate with experience in software development, database management, and web design.

EXPERIENCE

Part-time Software Engineer

Pixie E.E. November 2023 – Present

- Participated in the development and delivery of various customer projects.
- Created and modified business forms for Nexi Payments Greece, utilizing tools like **Visual Studio, SSMS, SQL, C#, and Excel (with VBA).**
- Contributed to web development projects using **WordPress** with **Elementor, HTML, and custom styling**.

PROJECTS

AI-Powered Adaptive Quiz System for Personalized Learning September 2025 - February 2026
PDF(GR) / PDF (EN)

- Built a full-stack educational platform using **FastAPI (Python) and React** for adaptive quizzes and learning progress tracking.
- Implemented the **SM-2 spaced repetition algorithm** to optimize review scheduling.
- Integrated **Google Gemini API** to generate quiz questions and flashcards automatically.

Java Memory Game -- Java GUI-based card game December 2024 - January 2025

- Designed and implemented a memory game with card flipping logic using Java.
- Developed the board, card logic, and basic UI interactions with event handling.
- Used **OOP** principles for game structure and extensibility.

Seat Booking System -- Java RMI/Socket-based distributed application April 2025 - May 2025

- Implemented a distributed ticket booking platform for events using **Java sockets** and **multi-threaded servers**.
- Developed **modules** for server, database interface, and client-side interaction.
- Applied concepts like **socket programming**, **threads**, and modular architecture in **Java**.
- Built a shared library for reusability across modules.

Music Library Client–Server App -- Java-based music management system April 2025

- Developed a client-server music library app with **Java**, using custom request/response objects.
- Built server-side logic to manage songs, albums, and client interactions via **TCP**.
- Designed multiple object models (Song, Album, Request, Response) with **serialization**.

Books REST API -- Mini project to build and serve a book catalog API June 2025

- Created a simple **RESTful API** using **Express.js** and **Node.js**.
- Supported basic **CRUD** operations on books.
- Demonstrated understanding of API routing, middleware, and server-side logic.

EDUCATION

Integrated Master's in Computer Information and Communication Systems Engineering

University of the Aegean • Samos • GPA 7/10 March 2026

SKILLS

- **Programming Languages:** Python, Java, C++, C#, SQL, HTML/CSS, JavaScript
- **Tools:** Git, Visual Studio, SSMS, WordPress (Elementor), XAMPP
- **Frameworks & Technologies:** FastAPI, React, REST APIs, SQLAlchemy, Node.js, Express.js
- **Languages: Greek** (Native Speaker), **English** (ECPE C2 Full Working Proficiency)
